HARRIS

MATERIAL SAFETY DATA SHEET

1. Product and Company Identification

Material name W1060 (R45) - W1200 (R60) Welding Rods

Version # 01

Issue date 28-February-2014

Revision date Supersedes date -

CAS # Mixture

Product type Carbon Steel Alloy

Product use Carbon Steel Oxyfuel Gas Welding.

Manufacturer information

Manufacturer/Supplier Harris Products Group

4501 Quality Place Mason, Ohio 45040 US custservmason@jwharris.com

2. Hazards Identification

Physical stateSolid.AppearanceSolid wire.Emergency overviewWARNING

May cause eye, skin and respiratory tract irritation. Toxic: danger of serious damage to health by

This product is considered hazardous under 29 CFR 1910.1200 (Hazard Communication).

prolonged exposure through inhalation.

OSHA regulatory status

Potential health effects

Routes of exposure Inhalation. Skin contact. Eye contact.

Eyes Fumes from heated material may cause eye irritation. Dust may irritate the eyes. Exposure to hot

material may cause thermal burns.

Skin Exposure to hot material may cause thermal burns. Dust may irritate skin.

Inhalation Inhalation of fumes may cause a flu-like illness called metal fume fever. Inhalation of dusts may

cause respiratory irritation.

Ingestion Ingestion is not likely to be a primary route of occupational exposure.

Target organs Respiratory system. Eyes. Skin. Central nervous system.

Chronic effects Chronic inhalation of fumes or dust may cause irritation or other respiratory conditions (e.g.,

bronchitis). May cause lung damage.

Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to benign

pneumoconiosis (siderosis).

Overexposure to manganese fumes may affect the brain and central nervous system, resulting in poor coordination, difficulty speaking, and arm or leg tremor. This condition can be irreversible

Long-term exposure to copper compounds may cause anemia. Refer to Section 11 Toxicological Information for more details.

Signs and symptoms Contact may cause irritation and redness. Dust may irritate respiratory system. Symptoms of

overexposure may be headache, dizziness, tiredness, nausea and vomiting. Typical metal fume fever begins four to twelve hours after sufficient exposure to freshly formed fumes. The first symptoms are a metallic taste, dryness and irritation of the throat. Cough and shortness of breath may occur along with headache, fatigue, nausea, vomiting, muscle and joint pain, fever and chills.

The syndrome runs its course in 24-48 hours.

Potential environmental effects Alloys in massive forms present a limited hazard for the environment.

W1060 (R45) - W1200 (R60) Welding Rods

CPH MSDS NA

3. Composition / Information on Ingredients

Components	CAS#	Percent
Manganese	7439-96-5	0.5 - 1.40
Copper	7440-50-8	0.3
Iron	7439-89-6	Balance

Composition comments All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in

percent by volume.

4. First Aid Measures

First aid procedures

Rinse immediately with plenty of water for at least 15 minutes. Remove any contact lenses. Get Eve contact

medical attention if irritation develops or persists.

Skin contact Remove contaminated clothes and rinse skin thoroughly with water for at least 15 minutes. Get

medical attention if irritation develops and persists.

Inhalation Remove person from contaminated area to fresh air. Apply artificial respiration if needed. Call a

physician if symptoms develop or persist.

Do NOT induce vomiting. Immediately rinse mouth and drink a cupful of water. Never give anything Ingestion

by mouth to an unconscious person. Get medical attention immediately.

Treat symptomatically. Notes to physician

General advice Show this safety data sheet to the doctor in attendance.

5. Fire Fighting Measures

Flammable properties Solid metal is not flammable; however, finely divided metallic dust or powder may form an

explosive mixture with air. Do not use water on molten metal: Explosion hazard could result.

Extinguishing media

Suitable extinguishing

media

Extinguish with foam, carbon dioxide or dry powder.

Unsuitable extinguishing

media

Do not use water or halogenated extinguishing media.

Protection of firefighters

Specific hazards arising from the chemical

Fire or high temperatures create: Metal oxides.

Fire fighting

equipment/instructions

Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Move containers from fire area if you can do it without risk.

6. Accidental Release Measures

Personal precautions Keep unnecessary personnel away. Avoid inhalation of dust from the spilled material. Wear

protective clothing as described in Section 8 of this MSDS. Do not touch damaged containers or

spilled material unless wearing appropriate protective clothing.

Prevent further leakage or spillage if safe to do so. Do not contaminate water. **Environmental precautions**

Stop leak if you can do so without risk. Local authorities should be advised if significant spillages **Methods for containment**

cannot be contained.

Collect for salvage or disposal. Put material in suitable, covered, labeled containers. Avoid the Methods for cleaning up

generation of dusts during clean-up. For waste disposal, see Section 13 of the MSDS.

Other information Clean up in accordance with all applicable regulations.

7. Handling and Storage

Follow the recommendations in ANSI Z49.1, Safety in welding and cutting (ANSI=American Handling

National Standard Institute). Avoid inhalation of dust and fumes. Use process enclosures, local exhaust ventilation, or other engineering controls to control sources of dust and fumes. Keep formation of airborne dusts to a minimum. Avoid contact with skin and eyes. Wear appropriate personal protective equipment (See Section 8). Do not eat, drink or smoke when using the

product. Wash thoroughly after handling. Avoid release to the environment.

Store in tightly closed original container in a dry, cool and well-ventilated place. Store in a closed Storage

container away from incompatible materials. Keep away from food, drink and animal feedingstuffs.

Mexico. Occupational Exposure Limit Values

Components	Туре	Value	Form
Manganese (CAS 7439-96-5)	STEL	3 mg/m3	Fume.
	TWA	1 mg/m3	Fume.
		0.2 mg/m3	

Engineering controls Provide adequate ventilation. Observe occupational exposure limits and minimize the risk of

inhalation of dust and fumes. Shower, hand and eye washing facilities near the workplace are

recommended.

Personal protective equipment

Eye / face protection Wear safety glasses with side shields (or goggles). When welding, it is recommended that safety

glasses, goggles, or face-shield with filter lens of appropriate shade number (per ANSI

Z49.1-1988, "Safety in Welding and Cutting") be worn.

Skin protection Protective clothing is recommended. When welding, wear protective clothing that protects from

sparks and flame (per ANSI Z49.1-1988, "Safety in Welding and Cutting").

Respiratory protectionUse a respirator when local exhaust or ventilation is not adequate to keep exposures below the

TLV. In a confined space a supplied respirator may be required. Selection and use of respiratory protective equipment should be in accordance with OSHA General Industry Standard 29 CFR 1910.134; or in Canada with CSA Standard Z94.4. Use a NIOSH/MSHA approved respirator if

there is a risk of exposure to dust/fume at levels exceeding the exposure limits.

General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective

equipment to remove contaminants.

9. Physical & Chemical Properties

Solid wire. **Appearance** Physical state Solid. Solid. **Form** Gray. Color Odorless. Odor Not available. Odor threshold Not available. pН Not available. Vapor pressure Vapor density Not available. 5432 °F (3000 °C) **Boiling** point 2372 °F (1300 °C) Melting point/Freezing point Insoluble in water. Solubility (water) Specific gravity 7.6 - 7.78 (water=1) Not available. Flash point Flammability limits in air. Not available. upper, % by volume Flammability limits in air, Not available. lower, % by volume Not available. **Auto-ignition temperature**

10. Chemical Stability & Reactivity Information

Chemical stability Material is stable under normal conditions. **Conditions to avoid** Contact with incompatible materials.

Incompatible materials Strong oxidizing agents. Strong acids. Strong bases. Acetylene. Ammonia. Hydrogen peroxide

(H2O2). Chlorine. Bromine, iodine, turpentine, magnesium metal. Hydrogen sulfide. Ammonium

nitrate.

Hazardous decomposition products

Toxic metal oxides are emitted when heated above the melting point. Welding fumes and gases cannot be classified simply. The composition and quantity of both are dependent upon the metal

being welded, the process, procedure and electrodes used.

Other conditions which also influence the composition and quantity of the fumes and gases to which workers may be exposed include: coatings on the metal being welded (such as paint, plating, or galvanizing), the number of welders and the volume of the worker area, the quality and amount of ventilation, the position of the welder's head with respect to the fume plume, as well as the presence of contaminants in the atmosphere (such as chlorinated hydrocarbon vapors from cleaning and degreasing activities.)

Fumes can be reasonably expected to include: Metal oxides.

Possibility of hazardous

reactions

Hazardous polymerization does not occur.

11. Toxicological Information

_			
IOX	ICO.	odica	l data

Components	Species	Test Results
Iron (CAS 7439-89-6)		
Acute		
Oral		
LD50	Rat	30 g/kg
Manganese (CAS 7439-96-5)		
Acute		
Oral		
LD50	Rat	9000 mg/kg
Sensitization	This product is not expected to cause skin sensitization.	
Acute effects	When heated, the vapors/fumes given off may cause respiratory tract irritation. High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever.	
Local effects	Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye, mucous membranes and respiratory tract.	
Chronic effects	Chronic inhalation of high concentrations of iron oxide fumes or dust may lead to benign

Alloys in massive forms are not mobile in the environment.

13. Disposal Considerations

Disposal instructions Dispose in accordance with all applicable regulations.

Waste from residues / unused

products

Recover and recycle, if practical. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is

emptied.
