SAFETY DATA SHEET
This Safety Data Sheet complies with Regulation (EC) No 1907/2006, 1272/2008, ISO 11014-1 and ANSI Z400.1

All-State 100

Replaces SDS: 2014-05-01
Issued: 2017-05-25

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

| Trade name | All-State 100 |

1.2. Relevant identified uses of the substance or mixture and uses advised against

| Use          | Brazing alloy |

1.3. Details of the supplier of the safety data sheet

| Supplier     | ESAB Welding & Cutting Products |
| Street address | 801 Wilson Ave. |
|              | Hanover, PA 17331 |
| Telephone    | 1-717-637-8911 |
| Fax          | 1-717-630-3458 |
| Email        | us.technical.fillermetals@esab.com |
| Web site     | www.esabna.com |

1.4. Emergency telephone number

| Emergency phone number | 1-800-424-9300 (Chemtrec) |
| Available outside office hours | Yes |

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

| Description | This product is not classified as hazardous according to applicable GHS hazard classification criteria as required and defined in OSHA Hazard Communication Standard (29CFR Part 1910.1200). |

2.2. Label elements

| More information | This product does not require labeling. |

2.3. Other hazards

This product contains nickel, which is classified as toxic by prolonged inhalation, a skin sensitizer and a suspect carcinogen. Skin contact is normally no hazard but should be avoided to prevent possible allergic reactions. Persons with a pacemaker should not go near...
brazing operations until they have consulted their doctor and obtained information from the manufacturer of the device.
When this product is used in a brazing process, the most important hazards are heat, radiation, electric shock and brazing fumes.
Fumes: Overexposure to brazing fumes may result in symptoms like metal fume fever, dizziness, nausea, dryness or irritation of the nose, throat, and eyes. Chronic overexposure to brazing fumes may affect pulmonary function. Prolonged inhalation of nickel compounds above safe exposure limits can cause cancer. Some individuals may develop a blue-grey skin pigmentation from exposure to silver (argyria).
Heat: Spatter and melting metal can cause burn injuries and start fires.
Radiation: Arc rays can severely damage eyes or skin. Skin contact is normally no hazard but should be avoided to prevent possible allergic reactions.
Electricity: Electric shock can kill.

Other
Emergency Overview: Metal wires in varying colors. This product is normally not considered hazardous when transported. Gloves should be worn when handling to prevent cuts and abrasions.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

Product based on This product is a continuous solid metal wire.

SECTION 4: First aid measures

4.1. Description of first aid measures

Electric shock: Disconnect and turn off the power. Use a nonconductive material to pull victim away from contact with live parts or wires. If not breathing, begin artificial respiration, preferably mouth-to-mouth. If no detectable pulse, begin Cardio Pulmonary Resuscitation (CPR). call emergency physician to the scene of the accident. Call a physician immediately.
Inhalation
If breathing has stopped, perform artificial respiration and obtain medical assistance immediately! If breathing is difficult, provide fresh air and call physician.

Skin contact
For skin burns from arc radiation, promptly flush with cold water. Get medical attention for burns or irritations that persist. To remove dust or particles wash with mild soap and water.

Eye contact
For radiation burns due to arc flash, see physician. To remove dusts or fumes flush with water for at least fifteen minutes. If irritation persists, obtain medical assistance.

4.2. Most important symptoms and effects, both acute and delayed
Not applicable

4.3. Indication of any immediate medical attention and special treatment needed
Not applicable

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media
No specific recommendations for brazing consumables. Brazing arcs and sparks can ignite combustible and flammable materials. Use the extinguishing media recommended for the burning materials and fire situation.

5.2. Special hazards arising from the substance or mixture
Not applicable

5.3. Advice for firefighters

Special protective equipment for fire-fighters
Wear self-contained breathing apparatus as fumes or vapors may be harmful.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Refer to Section 8.

6.2. Environmental precautions
Refer to Section 13.

6.3. Methods and material for containment and cleaning up
Solid objects may be picked up and placed into a container. Liquids or pastes should be scooped up and placed into a container. Wear proper protective equipment while handling these materials. Do not discard as refuse.

6.4. Reference to other sections
Refer to Section 8 and Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Preventive handling precautions
Handle with care to avoid stings and cuts. Wear gloves when handling brazing consumables. Avoid exposure to dust. Do not ingest. Some individuals can develop an allergic reaction to certain materials. Retain all warning and identity labels.

7.2. Conditions for safe storage, including any incompatibilities

Keep separate from chemical substances like acids and strong bases, which could cause chemical reactions.

7.3. Specific end use(s)

Brazing

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

Exposure limits
Use industrial hygiene monitoring equipment to ensure that exposure does not exceed applicable national exposure limits. The following limits can be used as guidance. Unless noted, all values are for 8 hour time weighted averages (TWA). For information about welding fume analysis refer to Section 10.

ACGIH TLV, mg/m3
Copper (fume, as Cu) 0.2
Nickel, elemental 1.5 Inhalable fraction
Silver (metal) 0.1 dust and fume
Zinc (metal) None

USA, OSHA PEL, mg/m3
8.2. Exposure controls

Not applicable

Other

Avoid exposure to welding fumes, radiation, spatter, electric shock, heated materials and dust.

Train welders to avoid contact with live electrical parts and insulate conductive parts.

Ventilation

Ensure sufficient ventilation to keep brazing fumes and gases from breathing zone and general area. Use special care when brazing painted or coated steels since hazardous substances from the coating may be emitted. Use special care when welding painted or coated steels since hazardous substances from the coating may be emitted. Use respirator or air supplied respirator when brazing in a confined space, or where local exhaust or ventilation is not sufficient to keep exposure values within safe limits.

Personal protective equipment

Wear hand, head, eyes, ear and body protection like welders gloves, helmet or face shield with filter lens, safety boots, apron, arm and shoulder protection. Keep protective clothing clean and dry. Check condition of protective clothing and equipment on a regular basis.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

9.2. Other information

Not applicable
SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity

Contact with chemical substances like acids or strong bases could cause generation of gas.

10.2. Chemical stability

Chemical stability

This product is stable under normal conditions.

10.3. Possibility of hazardous reactions

Possibility of hazardous reactions

Not applicable

10.4. Conditions to avoid

Conditions to avoid

This product is only intended for normal brazing purposes.

10.5. Incompatible materials

Incompatible materials

Not applicable

10.6. Hazardous decomposition products

Hazardous decomposition products

When this product is used in a brazing process, hazardous decomposition products would include those from the volatilization, reaction, or oxidation of the materials listed in Section 3 and those from the base metal and coating.

Fumes from this product may contain compounds of the following chemical elements: Cu, Ni, Ag, and Zn. The rest is not analyzed, according to available standards.

Other

Refer to applicable national exposure limits for fume compounds, including those exposure limits for fume compounds found in Section 8.

Nickel has a low exposure limit, in some countries, that may be easily exceeded.

Reasonably expected gaseous products would include carbon oxides, nitrogen oxides, and ozone. Air contaminants around the brazing area can be affected by the brazing process and influence the composition and quantity of fumes and gases produced.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Information on toxicological effects

Inhalation of welding and brazing fumes can be hazardous to your health. Classification of welding and brazing fumes is difficult because of varying base materials, coatings, air contamination and processes. The International Agency for Research on Cancer has classified welding fumes as possibly carcinogenic to humans (Group 2B).
SECTION 12: Ecological information

12.1. Toxicity

Not applicable

12.2. Persistence and degradability

Not applicable

12.3. Bioaccumulative potential

Not applicable

12.4. Mobility in soil

Not applicable

12.5. Results of PBT and vPvB assessment
12.6. Other adverse effects

Not applicable

Other

Brazing consumables and materials could degrade/weather into components originating from the consumables or from the materials used in the brazing process. Avoid exposure to conditions that could lead to accumulation in soils and groundwater.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

Discard any product, residue, disposable container or liner in an environmentally acceptable manner, in full compliance with federal and local regulations. Use recycling procedures if available.

USA RCRA: This product is not considered hazardous waste if discarded.

Residues from brazing consumables and processes could degrade and accumulate in soils and groundwater.

SECTION 14: Transport information

14.1. UN number

Not applicable

14.2. UN proper shipping name

Not applicable

14.3. Transport hazard class(es)

Not applicable

14.4. Packing group

Not applicable

14.5. Environmental hazards

Not applicable

14.6. Special precautions for user

Not applicable

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

Not applicable
SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Other regulations, limitations and legal regulations

Canada: WHMIS classification: Class D; Division 2, Subdivision A
Canadian Environmental Protection Act (CEPA): All constituents of this product are on the Domestic Substance List (DSL).

USA: This product contains or produces a chemical known to the state of California to cause cancer and birth defects (or other reproductive harm). (California Health & Safety Code § 25249.5 et seq.)

United States EPA Toxic Substance Control Act: All constituents of this product are on the TSCA inventory list or are excluded from listing.

CERCLA/SARA Title III Reportable Quantities (RQs) and/or Threshold Planning Quantities (TPQs): Product is a solid solution in the form of a solid article. Spills or releases resulting in the loss of any ingredient at or above its RQ require immediate notification to the National Response Center and to your Local Emergency Planning Committee.

Section 311 Hazard Class - As shipped: Immediate In Use: Immediate delayed

EPCRA/SARA Title III 313 Toxic Chemicals: The following metallic components are listed as SARA 313 "Toxic Chemicals" and potential subject to annual SARA 313 reporting. See Section 3 for weight percent.
- Copper: 1.0% de minimis concentration
- Nickel: 0.1% de minimis concentration
- Silver: 1.0% de minimis concentration
- Zinc (fume or dust): 1.0% de minimis concentration

15.2. Chemical safety assessment

Chemical safety assessment No

Other

Read and understand the manufacturer's instructions, your employer's safety practices and the health and safety instructions on the label. Observe any federal and local regulations. Take precautions when brazing and protect yourself and others.

Brazing fumes and gases are hazardous to your health and may damage lungs and other organs. Use adequate ventilation. ELECTRIC SHOCK can kill.

ARC RAYS and SPARKS can injure eyes and burn skin.

Wear correct hand, head, eye and body protection.

SECTION 16: Other information

Changes to previous revision

This Safety Data Sheet has been revised due to modifications to Sections 1-16.

Phrase meaning

H317 - May cause an allergic skin reaction.
H351 - Suspected of causing cancer.
H372 - Causes damage to the lungs through prolonged or repeated exposure by inhalation.

Other
ESAB requests the users of this product to study this Safety Data Sheet (SDS) and become aware of product hazards and safety information. To promote safe use of this product a user should:

- notify its employees, agents and contractors of the information on this SDS and any product hazards/safety information.
- furnish this same information to each of its customers for this product.
- request such customers to notify employees and customers for the same product hazards and safety information.

The information herein is given in good faith and based on technical data that ESAB believes to be reliable. Since the conditions of use is outside our control, we assume no liability in connection with any use of this information and no warranty, expressed or implied is given.

Contact ESAB for more information.
