1 Identification

· Product identifier
· Trade name: BÖHLER FOX CEL 90
· CAS Number: -
· EINECS Number: -

· Application of the substance / the mixture
Shielded Metal Arc Welding Electrode

The product is a manufactured article in the sense of Article 3 No. 3, 1907/2006/EC (REACH). The purpose of the present safety data sheet is therefore to provide instruction on safe usage of the product.

Details of the supplier of the safety data sheet

· Manufacturer/Supplier:
voestalpine Böhler Welding Austria GmbH
Böhler-Welding-Str. 1
8605 Kapfenberg

Tel.: +43/50304/31-0
Fax: +43/50304/71-95193
www.voestalpine.com/welding

voestalpine Böhler Welding USA
1601 Gillingham Suite 110
Sugar Land, TX 77478
Telephone: 281-499-1212
Fax: 832-944-6942
www.voestalpine.com/welding

· Information department:
  Research and Development
  Deniece Fiedler
  +43/50304/31-28299;
  Deniece.Fiedler@voestalpine.com

  Procurement/Logistics
  Chris Smith
  tel: 281-499-1212
  Mobile: 832-520-9040
  chris.smith@voestalpine.com

· Emergency telephone number:
NCEC
+1 202 464 2554 (USA, Canada)
+44 1865 407333 (English)
+44 1235 239670 (English, French, Spain)

2 Hazard(s) identification

· Classification of the substance or mixture
Classified according to the criteria of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS), OSHA Hazard Communication Standard (29 CFR 1910.1200) and the Canadian Controlled Products Regulations.

(Contd. on page 2)
Trade name: BÖHLER FOX CEL 90

The Product does not meet the criteria for classification in any hazard class according to GHS.

- Label elements
- GHS label elements Void
- Hazard pictograms Void
- Signal word Void
- Hazard statements Void
- NFPA ratings (scale 0 - 4)
  - Health = 0
  - Fire = 0
  - Reactivity = 0

HMIS-ratings (scale 0 - 4)
- HEALTH Health = 0
- FIRE Fire = 0
- REACTIVITY Reactivity = 0

Other hazards
- Results of PBT and vPvB assessment
  - PBT: Not applicable.
  - vPvB: Not applicable.

3 Composition/information on ingredients

- Chemical characterization: Mixtures
- Description: Mixture of the substances listed below with nonhazardous additions.

- Dangerous components:
  - CAS: 9004-34-6
  - EINECS: 232-674-9
  - Cellulose
  - 2.5-5%

  - CAS: 7439-96-5
  - EINECS: 231-105-1
  - manganese
  - 2.5-5%

4 First-aid measures

- Description of first aid measures
- General information: No special measures required.
- After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: Generally the product does not irritate the skin.
- After eye contact: Rinse opened eye for several minutes under running water.

- Most important symptoms and effects, both acute and delayed
  No further relevant information available.

- Indication of any immediate medical attention and special treatment needed
  No further relevant information available.

5 Fire-fighting measures

- Extinguishing media

- Suitable extinguishing agents: Suitable to surrounding conditions
Trade name: BÖHLER FOX CEL 90

- Special hazards arising from the substance or mixture: No further relevant information available.
- Advice for firefighters:
- Protective equipment: No special measures required.

6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
  Ensure adequate ventilation
  Use respiratory protective device against the effects of fumes/dust/aerosol.
- Environmental precautions: No special measures required.
- Methods and material for containment and cleaning up: Pick up mechanically.
- Reference to other sections
  See Section 7 for information on safe handling.
  See Section 8 for information on personal protection equipment.
  See Section 13 for disposal information.
- Protective Action Criteria for Chemicals

### 7 Handling and Storage

**Handling:**

- **Precautions for safe handling:** Ensure that suitable extractors are available on processing machines.
- **Information about protection against explosions and fires:** No special measures required.

**Conditions for safe storage, including any incompatibilities**

- **Storage:**
  - **Requirements to be met by storerooms and receptacles:** No special requirements.
8 Exposure controls/personal protection

- Control parameters
- Components with limit values that require monitoring at the workplace:

- Additional information: The lists that were valid during the creation were used as basis.

- Exposure controls
- Personal protective equipment:
- General protective and hygienic measures: Wash hands before breaks and at the end of work.
- Breathing equipment: Filter P2
- Protection of hands:
  Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
- Penetration time of glove material
  The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
- Eye protection: Safety glasses
- Body protection:
  Protective work clothing
  Wear hand, head, and body protection which help to prevent injury from radiation, sparks, and electrical shock. See ANSI Z49.1. At a minimum this includes welder’s gloves and a protective face shield, and may include arm protectors, aprons, hats, shoulder protection, and well as dark substantial clothing. Train the welder not to touch live electrical parts and to insulate himself from work and ground.

9 Physical and chemical properties

- Information on basic physical and chemical properties
- General Information
- Appearance:
  - Form: Solid
  - Color: According to product specification
  - Odor: Odorless
  - Odor threshold: Not determined.
Trade name: BÖHLER FOX CEL 90

- **pH-value:** Not applicable.
- **Flash point:** Not applicable.
- **Flammability (solid, gaseous):** Not determined.
- **Decomposition temperature:** Not determined.
- **Auto igniting:** Product is not self-igniting.
- **Danger of explosion:** Product does not present an explosion hazard.
- **Explosion limits:**
  - **Lower:** Not determined.
  - **Upper:** Not determined.
- **Density:** Not determined.
- **Relative density**
- **Vapor density**
- **Evaporation rate**
- **Water:** Insoluble.
- **Partition coefficient (n-octanol/water):** Not determined.
- **Dynamic:** Not applicable.
- **Kinematic:** Not applicable.
- **VOC content:** 0.00 %
- **Other information**
  - No further relevant information available.

### 10 Stability and reactivity

- **Reactivity** No further relevant information available.
- **Chemical stability**
- **Thermal decomposition / conditions to be avoided:**
  - No decomposition if used and stored according to specifications.
- **Possibility of hazardous reactions** No dangerous reactions known.
- **Conditions to avoid** No further relevant information available.
- **Incompatible materials:** No further relevant information available.
- **Hazardous decomposition products:**
  - Reasonably expected fume constituents of this product would include:
    - Copper Oxide
    - copper oxide.
    - Chromoxide.
    - Nickel oxide.
  - Reasonably expected gaseous constituents would include Carbon monoxide and Carbon dioxide. Ozone and nitrogen oxides may be formed by the radiation from the arc. One recommended way to determine the composition and quantity of fumes and gases to which workers are exposed is to take an air sample from inside the welder’s helmet if worn or in the worker’s breathing zone. See ANSI/AWS F1.1 and ANSI/AWS F1.2-1992. In order to determine and evaluation of the existing problem areas, the standards EN ISO15011 –parts 1,4 can also be applied.
11 Toxicological information

- Information on toxicological effects
  - Acute toxicity:
  - Primary irritant effect:
    - on the skin: No irritant effect.
    - on the eye: No irritating effect.
    - Sensitization: No sensitizing effects known.
  - Additional toxicological information: The product is not subject to classification according to internally approved calculation methods for preparations: When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information provided to us.

- Carcinogenic categories

  - IARC (International Agency for Research on Cancer)
    7440-02-0 nickel 2B
    13463-67-7 titanium dioxide 2B

  - NTP (National Toxicology Program)
    7440-02-0 nickel R

  - OSHA-Ca (Occupational Safety & Health Administration)
    None of the ingredients is listed.

12 Ecological information

- Toxicity
  - Aquatic toxicity: No further relevant information available.
  - Persistence and degradability: No further relevant information available.
  - Behavior in environmental systems:
  - Bioaccumulative potential: No further relevant information available.
  - Mobility in soil: No further relevant information available.
  - Additional ecological information:
  - General notes: Not hazardous for water.
  - Results of PBT and vPvB assessment
    - PBT: Not applicable.
    - vPvB: Not applicable.
  - Other adverse effects: No further relevant information available.

13 Disposal considerations

- Waste treatment methods
  - Recommendation: Must be specially treated adhering to official regulations.

- Uncleaned packagings:
  - Recommendation: Disposal must be made according to official regulations.

14 Transport information

- UN-Number
  void
Trade name: BÖHLER FOX CEL 90

- DOT, ADR, ADN, IMDG, IATA: Void
- UN proper shipping name: Void
- Transport hazard class(es): Void
- DOT, ADR, ADN, IMDG, IATA: Void
- Class: Void
- Packing group: Void
- DOT, ADR, IMDG, IATA: Void
- Environmental hazards:
  - Marine pollutant: No
- Special precautions for user: Not applicable.
- Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code: Not applicable.
- Transport/Additional information: Not dangerous according to the above specifications.
- UN "Model Regulation": Void

15 Regulatory information

- Safety, health and environmental regulations/legislation specific for the substance or mixture
  - No further relevant information available.
- Sara
  - Section 355 (extremely hazardous substances):

  - **Hazard pictograms** Void
  - **Signal word** Void
  - **Hazard statements** Void
  - **Chemical safety assessment**: A Chemical Safety Assessment has not been carried out.

### 16 Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

- **Additional information:**
  Recommendations for exposure scenarios, measures for risk management and identification of working conditions under which metals, metal alloys and products made of metal can be safely worked can be found attached. Detailed information can be found on our webpage www.voestalpine.com (Environment, REACH at voestalpine).
Welding Exposure Scenario WES - EN3138

Recommendations for Exposure Scenarios, Risk Management Measures and to identify Operational Conditions under which metals, alloys and metallic articles may be safely welded

Welding/brazing involves fumes which can affect human health and the environment. Fumes are a varying mixture of airborne gases and fine particles which, if inhaled or swallowed, constitute a health hazard. The degree of risk will depend on the composition of the fume, concentration of the fume and duration of exposure. The fume composition is dependent upon the material being worked, the process and consumables being used, coatings on the work such as paint, galvanizing or plating, all or combinations from cleaning and degreasing activities. A systematic approach to the assessment of exposure is necessary, taking into account the particular circumstances for the operator and auxiliary worker that can be expected.

Considering the emission of fumes when welding, brazing or cutting of metals, it is recommended to (1) arrange risk management measures through applying general information and guidelines provided by this exposure scenario and (2) using the information provided by the Safety Data Sheet, issued in accordance with REACH, by the welding consumable manufacturer.

The employer shall ensure that the risk from welding fumes to the safety and health of workers is eliminated or reduced to a minimum. The following principle shall be applied:
1. Select the applicable process/material combinations with the lowest class, wherever possible.
2. Set welding process with the lowest emission parameters.
3. Monitor the exposure to welding fumes and measure in accordance with class number. In general, the use of PPE is taken into account after all other measures is applied.
4. Wear the relevant personal protective equipment in accordance with the duty cycle.

In addition, compliance with the National Regulations regarding the exposure to welding fumes of workers and related personnel shall be verified.

In the table "Risk Management Measures for individual process / material combinations" below, reference is made to the following standards for collective and personal protection measures:

1. ISO 4083: Welding processes - Reference Numbers according to ISO 4083
2. EN ISO 15012-1:2004 Health and safety in welding and allied processes - Requirements, testing and marking of equipment for air filtration - Part 1: Testing of the separation efficiency for welding fumes
3. EN ISO 15012-2:2008 Health and safety in welding and allied processes - Requirements, testing and marking of equipment for air filtration - Part 2: Determination of the minimum air volume flow rate of cap fitting and nozzles
4. EN 148:2001 Respiratory protective devices - Filtering half masks to protect against particles - Requirements, testing, marking (FFP1 - FFP2 - FFP3)
5. EN 1335: 2002 Respiratory protective device - Light-duty construction compressed air line breathing apparatus incorporating a helmet or a hood - Requirements, testing, marking (LDH1 - LDH2 - LDH3)
6. EN 12941:1996 Respiratory protective devices - Prenzel filtering devices incorporating a helmet or a hood - Requirements, testing, marking (TH1 - TH2 - TH3)
7. Directive 1996/24/EC Article 8.9 on the protection of the health and safety of workers from the risks related to chemical agents at work
8. BGR 100: Berufsgenossenschaftliche Regel für Sicherheit und Gesundheit bei der Arbeit
9. TRGS 526: Schweiss-technische Arbeiten (Technische Regeln für Gefahrstoffe)

Also in the table "Risk Management Measures for individual processes / material combinations", reference is made to footnotes.

The description of these footnotes:
1. Class I: approximate ranking to mitigate risk by selecting process/material combinations with the lowest value.
2. Personal Protective Equipment (PPE) required avoiding exceeding the National Exposure Limit Value (SC: Duty cycle expressed in 8 hours)
3. General Ventilation (GV) Low. With additional Local Exhaust Ventilation (LEV) and extracted air to the outside, the GV or LEV capacity may be reduced to 1/3 of the original requirement.
4. General Ventilation (GV) Medium (double compared to Low)
5. Filtration half mask (FFP3)
6. When an allowed consumable is used, measures from "Class I" are required
7. General Ventilation (GV) Low. When no Local Exhaust Ventilation, the ventilation requirement is 5-fold
8. Filtration half mask (FFP3), helmet with powered filters (THD2P), or helmet with external air supply (LDH2)
9. Reduced negative pressurized area: A separate ventilated area where reduced negative pressure, compared to the surrounding area, is maintained.
10. Local Exhaust Ventilation (LEV) High, extraction at source (includes table, hood, arm or torch extraction)
11. Helmet with powered filters (THD3P), or helmet with external air supply (LDH3)
12. Local Exhaust Ventilation (LEV) Low, extraction at source (includes table, hood, arm or torch extraction)
13. Local Exhaust Ventilation (LEV) Medium, extraction at source (includes table, hood, arm or torch extraction)
14. Recommended measures to comply with national maximum allowable limits. Extracted fumes, for all materials except unalloyed steel and aluminium, shall be filtered before release in the outside environment.
15. A confined space, despite its name, is not necessarily small. Examples of confined spaces include ship, vessel, utility vaults, tank, etc.
16. Improved helmet, designed to avoid direct flow of welding fumes inside

**Risk Management Measures for Individual process / base material combinations**

**Department issuing SDS:**
Research and Development
Procurement/Logistics

**Contact:**
Deniece Fiedler
Chris Smith

**Date of preparation / last revision**: 09/16/2020 / 12
### Abbreviations and acronyms:

- **NCEC**: National Chemical Emergency Centre (=Carechem24)
- **ADR**: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International Carriage of Dangerous Goods by Road)
- **IMDG**: International Maritime Code for Dangerous Goods
- **DOT**: US Department of Transportation
- **IATA**: International Air Transport Association
- **ACGIH**: American Conference of Governmental Industrial Hygienists
- **EINECS**: European Inventory of Existing Commercial Chemical Substances
- **ELINCS**: European List of Notified Chemical Substances
- **CAS**: Chemical Abstracts Service (division of the American Chemical Society)
- **HMSI**: Hazardous Materials Identification System (USA)
- **TRGS**: Technische Regeln für Gefahrstoffe (Technical Rules for Dangerous Substances, BAuA, Germany)
- **VOC**: Volatile Organic Compounds (USA, EU)
- **PBT**: Persistent, Bioaccumulative and Toxic
- **vPvB**: very Persistent and very Bioaccumulative
- **NIOSH**: National Institute for Occupational Safety
- **OSHA**: Occupational Safety & Health
- **TLV**: Threshold Limit Value
- **PEL**: Permissible Exposure Limit
- **REL**: Recommended Exposure Limit
