Dymel™ A/Hydrocarbon Aerosol Propellant Blends

SECTION 1. PRODUCT AND COMPANY IDENTIFICATION

Product name: Dymel™ A/Hydrocarbon Aerosol Propellant Blends
Tradename/Synonym: Dimethylether (DME), LPGs, butanes, propane
Product Use: Propellant, for professional users only.
Restrictions on use: Do not use product for anything outside of the above specified uses.
Manufacturer/Supplier: The Chemours Company FC, LLC
1007 Market Street
Wilmington, DE 19899
United States of America
Product Information: 1-844-773-CHEM (outside the U.S. 1-302-773-1000)
Transport Emergency: CHEMTREC: +1-800-424-9300 (outside the U.S. +1-703-527-3887)

SECTION 2. HAZARDS IDENTIFICATION

Product hazard category:
- Gases under pressure: Liquefied gas
- Flammable liquids: Category 1
- Specific target organ toxicity - single exposure: Category 3

This SDS adheres to the standards and regulatory requirements of the United States and may not meet the regulatory requirements in other countries.
Label content

Pictogram :

Signal word : Danger

Hazardous warnings :
Extremely flammable liquid and vapour.
Contains gas under pressure; may explode if heated.
May cause respiratory irritation.
May cause drowsiness or dizziness.
Hazardous prevention measures:
Keep away from heat/sparks/open flames/hot surfaces. No smoking.
Keep container tightly closed.
Ground/bond container and receiving equipment.
Use explosion-proof electrical/ventilating/lighting/equipment.
Use only non-sparking tools.
Take precautionary measures against static discharge.
Avoid breathing dust/fume/gas/mist/vapours/spray.
Use only outdoors or in a well-ventilated area.
Wear protective gloves/eye protection/face protection.
If on skin (or hair): Remove/Take off immediately all contaminated clothing.
Rinse skin with water/shower.
If inhaled: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
Call a POISON CENTER or doctor/physician if you feel unwell.
In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.
Store in a well-ventilated place. Keep container tightly closed.
Store locked up.
Protect from sunlight. Store in a well-ventilated place.
Dispose of contents/container to an approved waste disposal plant.

Other hazards:
Rapid evaporation of the liquid may cause frostbite.
Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.
May cause cardiac arrhythmia.
Misuse or intentional inhalation abuse may cause death without warning symptoms, due to cardiac effects.

General advice: Never give anything by mouth to an unconscious person. When symptoms persist or in all cases of doubt seek medical advice.

Inhalation: Remove from exposure, lie down. Move to fresh air. Keep patient warm and at rest. Artificial respiration and/or oxygen may be necessary. Consult a physician.

Skin contact: Take off all contaminated clothing immediately. Flush area with lukewarm water. Do not use hot water. If frostbite has occurred, call a physician.

Eye contact: Hold eyelids apart and flush eyes with plenty of water for at least 15 minutes. Get medical attention.

Ingestion: Is not considered a potential route of exposure.

Most important symptoms/effects, acute and delayed: Anaesthetic effects Light-headedness irregular heartbeat with a strange sensation in the chest, heart thumping, apprehension, feeling of fainting, dizziness or weakness

Protection of first-aiders: If potential for exposure exists refer to Section 8 for specific personal protective equipment.
Notes to physician: Because of possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, that may be used in situations of emergency life support should be used with special caution.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media: Water spray, water fog, Dry chemical, Alcohol-resistant foam, Carbon dioxide (CO2)

Unsuitable extinguishing media: No applicable data available.

Specific hazards: Flammable. Cylinders are equipped with pressure and temperature relief devices, but may still rupture under fire conditions. This substance's fire decomposition by-products will include hydrofluoric acid, and possibly carbonyl fluoride. Avoid contact with these materials, which are toxic and irritating. Evacuate personnel immediately in the event of a fire involving this substance. Vapours may form explosive mixtures with air. Vapours are heavier than air and may spread along floors. Vapours or gases may travel considerable distances to ignition source and flash back.

Special protective equipment for firefighters: Use personal protective equipment. Wear neoprene gloves during cleaning up work after a fire. Exposure to decomposition products may be a hazard to health.

Further information: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Cool containers/tanks with water spray.

SECTION 6. ACCIDENTAL RELEASE MEASURES

NOTE: Review FIRE FIGHTING MEASURES and HANDLING (PERSONNEL) sections before proceeding with clean-up. Use appropriate PERSONAL PROTECTIVE EQUIPMENT during clean-up.

Safeguards (Personnel): Evacuate personnel to safe areas. Ventilate the area. Refer to protective
Environmental precautions: Should not be released into the environment. In accordance with local and national regulations.

Spill Cleanup: If this product is spilled and not recovered, or is recovered as a waste for treatment or disposal, the CERCLA Reportable Quantity is 100 lbs. (release of an Unlisted Hazardous Waste with the Characteristic of Ignitability). Evaporates. Ventilate area using forced ventilation, especially low or enclosed places where heavy vapors might collect.

SECTION 7. HANDLING AND STORAGE

Handling (Personnel): Avoid breathing vapours or mist. Avoid contact with skin, eyes and clothing. Provide sufficient air exchange and/or exhaust in work rooms. For personal protection see section 8. Lines and equipment should be pre-tested with nitrogen using soapy water to detect leaks. Handle in accordance with good industrial hygiene and safety practice.

Handling (Physical Aspects): Vapours are heavier than air and may spread along floors. Vapours may form flammable mixture with air. The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard. No sparking tools should be used. Take measures to prevent the build up of electrostatic charge. Keep away from open flames, hot surfaces and sources of ignition. When using do not smoke.

Dust explosion class: Not applicable

Storage: Keep container tightly closed in a dry and well-ventilated place. Store in original container. No materials to be especially mentioned. The product has an indefinite shelf life when stored properly.

Storage period: > 10 yr
Storage temperature : < 52 °C (< 126 °F)

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering controls : Ensure adequate ventilation, especially in confined areas. Use explosion-proof electrical equipment rated Class I, Group D in Division 1 locations. In Division 2 locations, all spark-producing electrical equipment must be explosion-proof and rated Class I, Group D. Non-sparking motors need not be explosion-proof. Ground all equipment and cylinders before use.

Personal protective equipment
Respiratory protection : For rescue and maintenance work in storage tanks use self-contained breathing apparatus. Vapours are heavier than air and can cause suffocation by reducing oxygen available for breathing.

Hand protection : Additional protection: Heat insulating gloves, and, Impervious gloves

Eye protection : Wear coverall chemical splash goggles. Additionally wear a face shield where the possibility exists for face contact due to splashing, spraying or airborne contact with this material.

Skin and body protection : Fire protective clothing (NOMEX) with antistatic control should be worn when handling this product. Wear protective clothing which covers any other exposed areas of the arms, legs, and torso.

Protective measures : When using do not smoke. Self-contained breathing apparatus (SCBA) is required if a large release occurs.

products by high temperatures (open flames, glowing metal surfaces, etc.) forming hydrofluoric acid and possibly carbonyl fluoride.

SECTION 11. TOXICOLOGICAL INFORMATION

Dimethyl ether

Inhalation 4 h LC50 : 164000 ppm, Rat
- Respiratory effects
- Anaesthetic effects
- Central nervous system depression
- Narcosis
- Cardiac irregularities
- Coma

Inhalation : Dog
- Cardiac sensitization

Dermal : Not applicable

Oral : Not applicable

Skin irritation : No skin irritation, Not tested on animals
- Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation : No eye irritation, Not tested on animals
- Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization : Not tested on animals
- Not expected to cause sensitization based on expert review of the properties of the substance.

There are no reports of human skin sensitization.

There are no reports of human respiratory sensitization.

Repeated dose toxicity : Inhalation
- Rat
- No toxicologically significant effects were found.

Carcinogenicity : Not classifiable as a human carcinogen.

Mutagenicity : Tests on bacterial or mammalian cell cultures did not show mutagenic effects.

Reproductive toxicity : No toxicity to reproduction
Evidence suggests the substance is not a reproductive toxin in animals.

Teratogenicity : Animal testing showed no developmental toxicity.

Further information : Cardiac sensitisation threshold limit : 376850 mg/m3

Butane (<0.1% butadiene)
Inhalation 4 h LC50 : 277018 ppm, Rat
Target Organs: Respiratory Tract, Central nervous system
Irritating to respiratory system.
Central nervous system depression
narcosis

Dermal : Not applicable

Oral : Not applicable

Skin irritation : No skin irritation, Not tested on animals
Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation : No eye irritation, Not tested on animals
Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization : Not tested on animals
There are no reports of human skin sensitization. Not expected to cause sensitization based on expert review of the properties of the substance.

Further information : Cardiac sensitisation threshold limit: 180369 mg/m³

Isobutane (<0.1% butadiene)
Inhalation 4 h LC50 : 276808 ppm, Rat
The toxicological data has been taken from products of similar composition.

Inhalation 4 h LC50 : > 31 mg/l, Rat

Inhalation Low Observed Adverse Effect Concentration (LOAEC) : 50000 ppm, Dog
Cardiac sensitization

Inhalation No Observed Adverse Effect Concentration : 25000 ppm, Dog
Cardiac sensitization

Dermal : Not applicable

Oral : Not applicable

Skin irritation : No skin irritation, Not tested on animals
Not expected to cause skin irritation based on expert review of the properties of the substance.

Eye irritation : No eye irritation, Not tested on animals
Not expected to cause eye irritation based on expert review of the properties of the substance.

Skin sensitization : Not tested on animals
Not expected to cause sensitization based on expert review of the properties of the substance.

Repeated dose toxicity : Inhalation
Rat
No toxicologically significant effects were found.

Mutagenicity : Tests on bacterial or mammalian cell cultures did not show mutagenic effects.
Animal testing did not show any mutagenic effects.
Reproductive toxicity : No toxicity to reproduction
Animal testing showed no reproductive toxicity.

Teratogenicity : Animal testing showed no developmental toxicity.

Further information : Cardiac sensitisation threshold limit : 118.9 mg/m3

Carcinogenicity
The carcinogenicity classifications for this product and/or its ingredients have been determined according to HazCom 2012, Appendix A.6. The classifications may differ from those listed in the National Toxicology Program (NTP) Report on Carcinogens (latest edition) or those found to be a potential carcinogen in the International Agency for Research on Cancer (IARC) Monographs (latest edition).

None of the components present in this material at concentrations equal to or greater than 0.1% are listed by IARC, NTP, or OSHA, as a carcinogen.

SECTION 12. ECOLOGICAL INFORMATION

Aquatic Toxicity
Dimethyl ether

96 h LC50 : Poecilia reticulata (guppy) > 4,000 mg/l
96 h EC50 : Pseudokirchneriella subcapitata (green algae) 154.917 mg/l
48 h EC50 : Daphnia (water flea) > 4,000 mg/l
48 h LC50 : Daphnia (water flea) 755.549 mg/l

Due to its physical properties, there is no potential for adverse effects.

Butane (<0.1% butadiene)

96 h LC50 : Fish (unspecified species) > 1,000 mg/l

Propane

96 h LC50 : Fish 24.11 mg/l
72 h EC50 : Algae 7.71 mg/l
48 h EC50 : Daphnia (water flea) 14.22 mg/l

Isobutane (<0.1% butadiene)
96 h LC50 : Fish 24.11 mg/l
72 h EC50 : Algae 7.71 mg/l
48 h EC50 : Daphnia (water flea) 14.22 mg/l

Environmental Fate
Dimethyl ether
Biodegradability : Product is not expected to be biodegradable.

Butane (<0.1% butadiene)
Biodegradability : 100 %

SECTION 13. DISPOSAL CONSIDERATIONS
Waste disposal methods - Product : Can be used after re-conditioning. Reclaim by distillation, incinerate, or remove to permitted waste facility. Comply with applicable Federal, State/Provincial and Local Regulations. May be a RCRA Hazardous waste due to the ignitability characteristic.

Contaminated packaging : Empty pressure vessels should be returned to the supplier.

SECTION 14. TRANSPORT INFORMATION
DOT UN number : 3161
Safety Data Sheet

Dymel™ A/Hydrocarbon Aerosol Propellant Blends

Version 0.0

Revision Date 09/16/2015

Proper shipping name: Liquefied gas, flammable, n.o.s. (Dimethyl ether, Liquefied Petroleum Gas)
Class: 2.1
Labelling No.: 2.1
Reportable Quantity: 100 lbs Dimethyl ether

IATA_C
UN number: 3161

Proper shipping name: Liquefied gas, flammable, n.o.s. (Dimethyl ether, Liquefied Petroleum Gas)
Class: 2.1
Labelling No.: 2.1
UN number: 3161

IMDG
Proper shipping name: LIQUEFIED GAS, FLAMMABLE, N.O.S. (Dimethyl ether, Liquefied Petroleum Gas)
Class: 2.1
Labelling No.: 2.1

SECTION 15. REGULATORY INFORMATION

SARA 313 Regulated Chemical(s): This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

PA Right to Know Regulated Chemical(s): Substances on the Pennsylvania Hazardous Substances List present at a concentration of 1% or more (0.01% for Special Hazardous Substances): Dimethyl ether, Butane (<0.1% butadiene), Propane, Isobutane (<0.1% butadiene)

NJ Right to Know Regulated Chemical(s): Substances on the New Jersey Workplace Hazardous Substance List present at a concentration of 1% or more (0.1% for substances identified as carcinogens, mutagens or teratogens): Dimethyl ether, Butane (<0.1% butadiene), Propane, Isobutane (<0.1% butadiene)

CERCLA Reportable Quantity: 100 lbs
Based on the percentage composition of this chemical in the product.
